**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Brisk northerly or northwesterly winds will give quite cool conditions across summits. Sunshine will be strong so skin protection is advised.

Forecast for Friday 30 Jun 2023

Weather: Turning cloudier during the early hours of Friday morning with cloud lowering throughout the day, probably shrouding summits by the middle part of the day. Outbreaks of rain and drizzle then arriving Friday afternoon and turning persistent through the evening and overnight period, with some wet conditions developing. Fresh to strong southerly or southwesterly winds, becoming westerly later.

Maximum wind: Southerly with gusts reaching around 40 mph late afternoon.

Chance of cloud-free hill tops above 800m: 80% becoming 10% or less by the afternoon.

Low Cloud and visibility: Scattered bases around 700m soon becoming broken bases 600m in morning, and lowering further to overcast bases 300m in afternoon and evening.

Temperature: **Valleys:** Plus 10 degrees Celsius rising to plus 18 degrees Celsius in afternoon.
At 800m: Plus 7 degrees Celsius rising to plus 10 degrees Celsius in afternoon.
Freezing level: Well above summits.
